

Airboss Defense Group CBRN MALO (Moulded Airboss Lightweight)

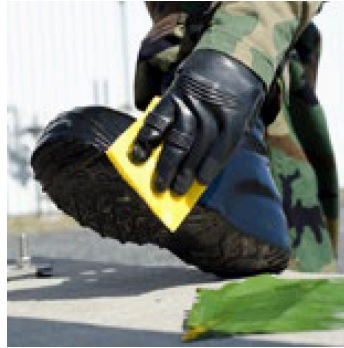

The Airboss Defense Group MALO overboot is constructed with bromobutyl rubber and provides chemical, biological, and battlefield contaminant protection. It is the premier overboot solution world-wide and is currently fielded with Canadian, UK, and US forces, and has been integrated globally with most chemical protective ensembles.

Seamless Bromobutyl Rubber

Anti-static Sole

Quick Decontamination

Ambidextrous Design for Easy Donning and Doffing

Features

- **Lightweight and Rugged** – Delivers improved mobility and comfort with an aggressive, self-cleaning, and anti-static sole, ensuring superior performance in any environment. Comprehensive
- **Sizing** – Available in five sizes covering 95% of the population, providing an optimal fit for any user.
- **Quick Decontamination** – Designed for easier immediate decontamination in the field and easy doffing during final decontamination.
- **Proven Design** – Ambidextrous design, adjustable straps, and matte finish allow for easy donning and doffing, ensuring users can quickly respond in any event.
- **Up to 24 Hours of Protection** – Proven continuous protection against chemical and biological agents, and a wide range of toxic industrial chemicals, reducing the risk of exposure.

Specifications

Material

Black, seamless bromobutyl rubber

Construction

350mm external total height (size L), ambidextrous, non-clogging sole

Weight

2.62 lbs (1.19kg) per pair (size L)

Shelf Life

15 years in original packaging

Operational Range

–49°F to 158°F (–45°C to 70°C)

Recommended Storage

–58°F to 140°F (–50°C to 60°C)

Packaging

Low profile vacuum packed in clear plastic

CE Certificate

E 0598
