

Barrier By Design

Indoor/Outdoor Barrier Systems

Barrier By Design Barrier Systems provide privacy, and increase safety and security. They quickly deploy to block and barricade accident scenes, restricted zones, and hazardous areas from public view. They are flexible, expandable, and customizable. They are engineered to be weather and wind resistant, but can also be used indoors.

Features

Quick & Easy

- One person deployment in minutes
- No tools needed

Durable

- High quality steel tripods
- Durable all-weather blackout panels
- Weighted for stability in all conditions and terrain

Convenient

- Lightweight
- Compact
- Easy to store and transport in wheeled travel bags

Expandable

- Extendable sections for 3.5 – 6.5 feet of expandable coverage
- Connect additional panels for unlimited continuous coverage
- Pivots for angled coverage

Protective

- Victim's privacy
- Evidence
- First responders
- Property

Effective

- Each barrier is 6'6" in height
- Magnetic warning beacons attached to tripods
- Reflective striping enhances visibility
- Optional 8' 40,000 or 7,000 lumen spot-light available

Stable

- 15 LB ballast bags provide support for each tripod
- Magnet and bungee system release and recover in windy conditions
- Steel tripods for stability

Customizable

- Logo, emblem or branding available
- Warning, restricted area, do not cross and other directives available

Responsible

- American made
- Woman owned
- GSA approved
