

# Kappler ProVent Plus Emergency Medical Coverall

Economical | Passes ASTM F1671 | Certified to NFPA 1999

ProVent Plus Emergency Medical Coveralls are economically priced single-use garments certified to NFPA 1999, and meet OSHA and CDC guidelines for biohazard exposure.

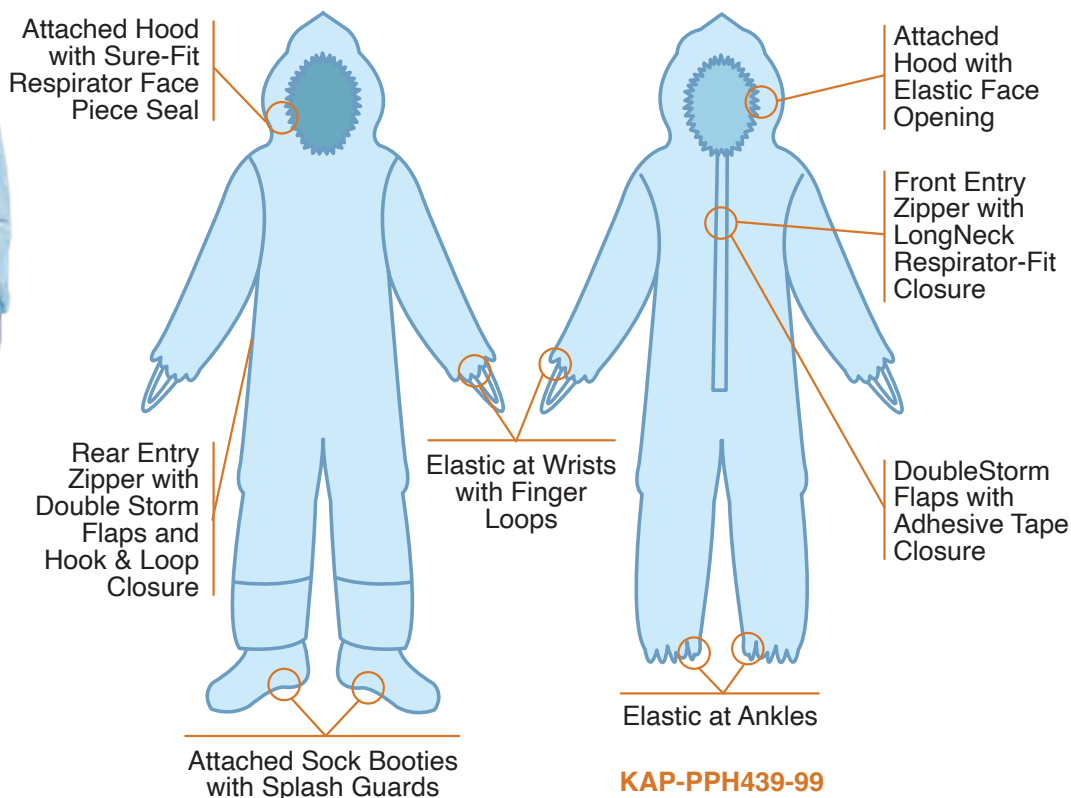

The use-and-dispose distinction of ProVent Plus means emergency responders and health-care workers faced with infected body fluids and other biohazards can achieve proven protection at a much lower cost than reusable garments.

In addition to passing the ASTM F1671 blood and viral penetration tests, ProVent Plus is a microporous fabric that offers increased comfort due to its high moisture vapor transmission rate (MVTR). Available in black and in blue configurations. Heat sealed / taped seams. Made in America. **Submit a quote request and receive special discount pricing.**
