

Losberger Decon TAG Shelters

10 to 20 minutes with 2 to 4 people | Mass Decontamination Shower System

The Losberger Collective Decontamination Tents (TAG) offer a rapidly deployable solution to control and protect people against CBRN and industrial hazards. They have an inflatable frame, a plug-and-play design, and set up in just a few minutes. Designed for mass decontamination, they can integrate up to three decontamination lanes to manage a constant flow of ambulatory and non-ambulatory victims. They provide different areas for triage, undressing, showering, and post-treatment control. The Losberger Collective Decontamination Tent is a turn-key system that is fully equipped to allow a quick and efficient response in case of an industrial accident, a bioterrorist attack, or a chemical spill. They are available in 4 sizes and 3 colors.

Shelter Includes:

- Master Blaster and Hose Kit for inflation
- 2 or 3 doors on each end creating the desired 2 or 3 lanes (depending on size of TAG purchased)
- Interior Dividers
- Interior Shower Hoses
- Hand Sprayer
- Elevation Grids to cover the entire surface of the inflatable Shower Basin Bay
- Stake Down Kit
- Repair Kit
- Instruction Manual

Add Ons Includes:

- LED lights
- Decon hose set to run from equipment to the Decon shelter
- Hydrofor pump with pressure system
- Waste pump
- Water heater and detergent injector (Dosa-tron)
- Inducer (Dosatron) 0.2-2% Geka Coupling, in box
- Stretcher with over-tuning protection
- Conveyor with over-tuning protection
- Flexible bladder tank 3000LT (with GEKA connection) for clean or waste water

	Lanes	Bays	Width	Length	Height	Surface	Weight	Capacity
