

# TMM Large-Span Inflatable Shelter

*The Number One Shelter for Emergency Situations, Rapid Deployment*

## Description

The Losberger Inflatable TMM Large-Span Shelter is a unique modular system that allows users to create larger size shelters by adding modules. The Losberger Inflatable TMM Large-Span Shelter can be built and deployed in 40 to 60 minutes with four (4) to eight (8) people depending on the number of modules added. The Losberger Inflatable TMM Large-Span Shelter (base configuration) consists of three (3) interconnectable modules (front, mid, and rear) with a total of six (6) arches and four (4) exterior doors. It can be extended by adding mid modules. Each mid module adds 440 sq ft of floor space, has two (2) exterior doors, and are open on two (2) sides. Front and back modules are open on one (1) side to allow for a seamless connection to mid modules.

The resistance and robust construction of the TMM Shelter, TMM Modules, and accessories, ensure sustainable and effective use on any kind of land. The shelter and modules are made of durable, fire and UV-resistant, PVC-coated fabric (military grade 22 oz/sq yd), using High Frequency Welding (HFW) to construct the cover and floor into one enclosure.

The Losberger Inflatable TMM Large-Span Shelter and Module is available in four (4) colors: green, orange, sand, or white. Included with a purchase of the Losberger Inflatable TMM Large-Span Shelter is an electronic self-monitoring inflater.

## Optional Equipment

- Automatic pressure control system
- Internal partition walls
- Internal liners
- External sunshade
- Protective groundsheet
- Lighting
- Electrical distribution box
- Heating/AC systems
- Flooring
- Side door(s)
- Connecting & entrance modules
- Printed logos

## Included

- Inflation System: Master Blaster Electric Inflator and hose kit.
- Stake Down Kit
- Repair Kit
- Instruction Manual

## Fabric Colors

- White, orange, sand, green
- Other colors on request

## Load Resistance

- Wind: 50mph
- Snow: 2.09 lb/sqft
