

Vericor Hospital Incident Command Center Workstation

The Vericor Hospital Incident Command Center has room to organize and ready supplies for the next logistical, operational, or command situation so that command and control is established quickly and easily from one centralized mobile command station.

Hospitals can organize and store all incident supplies within this compact, mobile unit. It features an adjustable laptop stand, overhead light, data jacks, inlay map/doc grease board, two Easyboards®, a wide wheel base, detachable fold-out table, and is fully lockable. Be prepared the next time an incident happens and a mobile solution is needed.

Features

1. Integrated overhead light for a bright work space.
2. Adjustable laptop stand for computers or tablets.
3. Two Easyboards® for whiteboard/document visibility.
4. Integrated work surface data and power hub.
5. Shelving has built-in electrical.
6. Stainless steel drawers.
7. HICS organizational chart included.
