

Westcot Baby Crib

The Westcot Baby Crib was manufactured with the utmost safety in mind. It features a low profile which provides easy accessibility to the infant, but it has a deep enough pocket to protect most 0 to 18-month-old babies from injury. The mesh sides enable care takers to easily see the infant inside the crib.

The Westcot Baby Crib securely attaches to most Westcots with safety rail brackets and four durable tubular poles. As a secondary measure, a crib securing strap is included. The securing strap wraps around the Westcot base and holds the crib firmly to the Westcot. Two cribs can be attached to one Westcot which minimizes the footprint of this system. The Westcot Baby Crib includes a 2-inch convoluted foam mattress that is antimicrobial, and soil and puncture resistant.

Features

- Mattress included
- Crib securing strap included
- Friction welded aluminum tube ends eliminate the potential for injury
- Minimal footprint: 2 Westcot Baby Cribs can secure to most Westcots
- Side leg mounted stabilizing bars prevent the joined structure from tipping during deployment
- Non-slip foot attachments prevent slipping and sliding
- All materials exceed FED STD 1633 for flammability
- Accordion style design for quick deployment and compact storage
- Safety instruction included

Specifications

Mattress: Included – 2" convoluted foam mattress, antimicrobial, soil resistant, and puncture resistant

Materials: All materials exceed FED STD 1633 for flammability

Securing straps: Included

Design: Accordion style design allows for quick deployment and compact storage

Frame: Aluminum, lightweight and rust proof

Dimensions (deployed): 34" x 34" x 14 – 28"

Dimensions (stored): 34" x 34" x 4"

Weight: 5 Lbs.

Carton Quantity: 2
