

Westcot Bariatric Special Needs Cot

The Westcot Bariatric Special Needs Cot was introduced in response to the overwhelming demand for a cot that could handle large survivors who were displaced during Hurricane Harvey, Maria, and Irma in 2017. Integrity Medical Solutions (IMS), the manufacturer of Westcot Cots, rose to the challenge and launched the Westcot Bariatric Special Needs Cot to directly address this industry necessary. The Westcot Bariatric Special Needs Cot is a superior product that is guaranteed to perform. IMS tests all products annually to ensure product compliance. However, with the Westcot Bariatric Special Needs Cot IMS went above and beyond and subjected this particular product to a gauntlet of challenging tests.

Available to purchase as a single cot or as a 5-patient all terrain system.

Westcot Bariatric Special Needs Cot All Terrain 6-Patient System

The Westcot Bariatric Special Needs All Terrain 6-Patient System was designed for rapid deployment and to assist response agencies with the expedited delivery of Westcots to nearly any environment.

The Westcart storage cart has four all terrain casters so there is zero deflation concerns. Two of the enhanced casters are equipped with high quality brakes to assure operation safety.

There are five (5) Westcot Bariatric Special Needs Cots and five (5) Westcot Rapid Deployment Bags. The optional stow on board IV poles and safety rails provide added precautions. The Disposable Linen Packs (included) improve deployment efficiency. For added protection the entire system is covered in a triple layer vinyl dust cover which is soil and puncture resistant.
