

Wi-Care Newborn Baby Mover Apron

The Wi-Care Newborn Baby Mover Apron was designed for the **easy, safe, and quick evacuation** of premature and newborn babies. Ergonomically designed for easy carry and **hands-free** for opening doors, carrying needed provisions, and making emergency calls.

Three (3) infants can be evacuated by one (1) nurse safely and quickly

Hands-free and ergonomically designed

Fast, easy evacuation when every second counts

- Hands-free carry design
- Ergonomically designed for rescuer comfort
- Rescuers can sit/stand wearing apron
- Mesh panel around infant face/head for maximum air flow
- Pockets have securing straps to keep baby in place
- Shoulder loop for the attachment of an IV bag if needed
- Apron measures 28 inches across shoulders and is 38 inches long
- Pocket height is 8.66", depth 20.47", width 4"
- Engineered with fire-resistant materials
- Three (3) pockets can hold up to 13 pounds each

▲ Hands-free ergonomic design allows rescuers to carry provisions, make emergency phone call, or hold onto railing for fast, safe evacuation.

Quickly place infants into mesh panel pockets, secure infant pockets with straps, and exit to safety ▶
