

First Line Technology Personal Decon Kit (PDK)

The First Line Technologies Personal Decon Kit (PDK) quickly and easily destroys Fentanyl and other synthetic opioids, such as TICs, TIMs, CWAs and BWAs. It allows users to remove bulk decontamination with FiberTect wipes, then eliminate any remaining contaminants using Dahlgren Decon. The entire First Line Technologies Personal Decon Kit (PDK) is lightweight and portable and is perfect for a variety of immediate, tactical, operational, and cold weather decontamination. Two configurations to choose from (active and training with inert components):

Features Include:

- Designed for individual use
- Active and training (inert components) configurations available
- Lightweight, portable decon kit
- Resealable for disposal
- Includes everything needed to preform Hybrid Decon including Dahlgren Decon and FiberTect

(1) Resealable Bag

Contents

(1) 200 mL Dahlgren Decon Configuration

(2) 6" x 12" FiberTect Wipes

(1) 500 mL Mixing Beaker
(1) Mini Sprayer
(1) Mixing Stir Rod
